

***Performance Tested Methods*SM Program: Validation of Rapid Chemical Methods**

Who Should Attend

Method developers, contract laboratories, food manufacturing quality assurance personnel and AOAC methods experts are encouraged to attend. Attendance is required for those contract laboratories interested in qualifying as independent laboratories and those individuals interested in qualifying as expert reviewers for the AOAC Research Institute *Performance Tested Methods*SM program.

What You Will Learn

The presentations will include an overview of the *Performance Tested Methods*SM program, detailed information and suggestions for performing the laboratory work necessary for a validation study along with specifics and examples on the current recommended statistical analysis for the evaluation of chemical methods. This course will provide practical real-life examples of AOAC validation studies.

All attendees will receive a “Certificate of Training”.

Level of Course (Basic, Intermediate, Advanced, Pre-requisite)

This is an intermediate level course and is suggested as a pre-requisite to the training course named, “*Official Methods of Analysis*SM Program: Collaborative Study of Chemical Methods”.
